

# Are you at the **FIRST STEP** of machine safety: **! IDENTIFYING HAZARDS?**

You need a trusted partner who can **quickly identify:**

- ✓ **Machine Safety Hazards**
- ✓ **Compliance Gaps**
- ✓ **Cost & Impact**

## WE'RE HERE TO HELP

We offer a choice of **three methods** for machine safety hazard identification:

### Safety Survey

Quickly & cost-effectively identify machine safety risks & which machines are most hazardous

### Risk Assessment

Comprehensive, detailed, and conforms with the ISO-12100, ANSI B11.0, and RIA TR 15 risk assessment requirements

### Risk Assessment & Detailed Scope

Builds on the Risk Assessment with drawings, corrective actions, a fixed-price proposal & more

Not sure what method you need? Our consultants can recommend a method based on your budget & timeline.

## THE MPSA ADVANTAGE

**Flexibility** to fit your requirements, timeline, and budget.

We'll **fill any gaps** from any previous safety assessments and ensure no efforts are duplicated.

**Progress at your pace.** Pay as you go and watch us add immediate value to your safety initiatives.

**We won't leave you without answers.** We'll guide your project towards a complete, turnkey solution.

## REDUCE RISK & GET COMPLIANT TODAY
